Program Description

Primary care practices and key stakeholders often face challenges in identifying how to work together to best meet patient needs, improve population health and improve clinician well-being. This annual conference is designed to assist attendees with identifying, developing utilizing strategies to advance integrated primary care and improve patient and family outcomes. Key components of the program include sessions on strengthening team based care in pediatric and adult primary care practices, collaborating with specialists and developing sustainable population health initiatives.

Target Audience

All CTC-RI practices, past and present, are welcomed to attend the morning session, or the afternoon session, or the full day program. We invite Practice Leadership, Providers, Nurse Care Managers, Care Coordinators, Behavioral Health Staff, Practice Managers, Pharmacists, Medical Assistants, Community Health Workers, and CTC stakeholders to come learn as a team!

Learning Objectives

At the end of the session, attendees will be able to identify strategies the primary care team can use to:

- ✓ Provide comprehensive primary care
- ✓ Improve population health
- ✓ Assist children, individuals and families with substance use disorders

Registration Information

The agenda is designed to accommodate attendees work schedules and interests. Attendees may choose to register for: Morning only (7:30–12:50), Afternoon only (1:40–3:40), or the Full Day program.
