The 2nd Annual Rhode Island Hospital and Warren Alpert Medical School of Brown University Wound Care Symposium provides world class keynote speakers on hot topics such as biofilms, stem cells in wounds, and updates on the latest technologies. It is part of a grass roots movement by the Wound Healing Society and Brown University to improve care of patients with difficult to heal wounds.

**Target Audience**
The conference is designed for the interdisciplinary team of Physicians, Podiatrists, Nurses, Researchers involved in wound healing or wound care issues.

**Learning Objectives**
At the conclusion of this activity, participants should be able to:
1. Employ an interdisciplinary approach to wound prevention, treatment, and limb salvage.
2. Describe the comprehensive management of patients with venous, arterial, and diabetic wounds.
3. Provide optimal healthcare delivery through improved understanding and the use of novel wound care technologies that allows for better outcomes.
4. Describe various factors that inhibit wound healing including medical co-morbidities, commonly used drugs and devices, and other challenges.
5. Assess existing evidence-based criteria for efficacy of commonly used wound care treatments including negative pressure wound therapy and hyperbaric oxygen therapy.
